NOTES

– The mean surface elevation of Lake Gatun is approximately 26 meters (85 ft) above mean sea level.

– Island shoreline is based on a 1927 survey by the Panama Canal Company, and is believed to represent a high, rainy season water level.

– Contours and elevation data derived from photogrammetric source compiled by the Defense Mapping Agency.

– The highest elevation on Barro Colorado Island is approximately 171 meters, as portrayed on this map.

PROJECTION: Transverse Mercator
HORIZONTAL DATUM: 1927 North American
VERTICAL DATUM: Mean Sea Level

Produced in collaboration with Judi Skillman, Robert Stallard and Wiebke Thiess, 29/Oct/98.
Produced from a digital, vector database derived from best available sources.
Cartographers: David Kinner and Steven Paton
